

# NATIONAL INSTITUTE OF TECHNOLOGY, TIRUCHIRAPPALLI

## Department: Physics

COURSE PLAN			
<b>Name of the program and specialization</b>	<b>B.Tech. I Semester - Computer Science and Engineering (CSE)</b>		
<b>Course Title</b>	<b>Physics</b>		
<b>Course Code</b>	<b>PHIR11</b>	<b>No. of Credits</b>	<b>3</b>
<b>Course Code of Pre-requisite subject(s)</b>	<b>NIL</b>		
<b>Session</b>	<b>July 2021</b>	<b>Section (if, applicable)</b>	
<b>Name of Faculty</b>	<b>Dr. T. Sonamani Singh</b>	<b>Department</b>	<b>CSE-A</b>
<b>Official Email</b>	<b>takhel@nitt.edu</b>	<b>Telephone No.</b>	
<b>Name of Course Coordinator(s) (if, applicable)</b>			
<b>Official E-mail</b>		<b>Telephone No.</b>	
<b>Course Type (please tick appropriately)</b>	<input checked="" type="checkbox"/> <b>Core course</b>	<input type="checkbox"/> <b>Elective course</b>	
<b>Syllabus (approved in BoS)</b>			
<p><b>Lasers</b> Introduction to Laser-characteristics of Lasers-spontaneous and stimulated emissions – Einstein’s coefficients – population inversion and lasing action – laser systems: He-Ne Laser, semiconductor laser-applications.</p> <p><b>Fiber Optics</b> Snell’s law-optical fiber – principle and construction – acceptance cone - numerical aperture –types of fibers - fiber optic communication principle – fiber optic sensors.</p> <p><b>Quantum Mechanics</b> Inadequacy of classical mechanics-black body radiation, photoelectric effect- wave and particle duality of radiation – de Broglie concept of matter waves – electron diffraction – Heisenberg’s uncertainty principle – Schrodinger’s wave equation – eigen values and eigen functions – superposition principle – interpretation of wave function – particle confined in one dimensional infinite square well potential.</p> <p><b>Nuclear and Particle Physics</b> Nuclear properties and forces - Nuclear models - Shell model - Nuclear reaction - Radioactivity - types and half-life. Fundamental forces - Particle physics - classification of matter - quark model.</p> <p><b>Physics of Advanced Materials</b> Conductors: classical free electron theory (Lorentz –Drude theory) – electrical conductivity. Superconductors: definition – Meissner effect – type I &amp; II superconductors – BCS theory (qualitative). Nanomaterials: introduction and properties – synthesis – top-down and bottom-up approach – applications.</p>			

# NATIONAL INSTITUTE OF TECHNOLOGY, TIRUCHIRAPPALLI

## COURSE OBJECTIVES

1. To introduce the notions of light matter interaction, fabrication of lasers, light propagation in waveguides, applications of lasers and optical fibers to engineering students.
2. To comprehend and explain the concepts of matter waves, wave functions and its interpretation to understand the matter at atomic scale.
3. To teach the fundamentals of nuclear forces, models and classification of matter.
4. To impart knowledge about the basics of conductors, superconductors, nanomaterials and their applications in science, engineering and technology.

## Course Outcomes

On completion of this course, the students will be able to,

- know principle, construction and working of lasers and their applications in various science and engineering.
- explain light propagation in optical fibers, types and their applications.
- experience and appreciate the behaviour of matter at atomic scale, and to impart knowledge in solving problems in modern science and engineering.
- understand the role of nuclear and particle physics in applications like radioactivity and nuclear reactions.
- recognize, choose and apply knowledge to develop materials for specific applications for common needs.

## COURSE PLAN – PART II

### COURSE TEACHING AND LEARNING ACTIVITIES

Sl. No.	Week/Contact Hours	Topic	Mode of Delivery
1.	18 <sup>th</sup> Dec	Introductory class to the syllabus of PHIR11 course	Power point with digital writing board (online)
2.	Dec 4 <sup>th</sup> Week	Inadequacy of classical mechanics, black body radiation, photoelectric effect, wave and particle duality of radiation	Power point with digital writing board (online)
3.	Dec 5 <sup>th</sup> Week	de Broglie concept of matter waves, electron diffraction, Heisenberg's uncertainty principle, Schrodinger's wave equation	Power point with digital writing board (online)
4.	Jan 2 <sup>nd</sup> Week	Eigen values and eigen functions, superposition principle, interpretation of wave function, particle confined in one dimensional infinite square well potential	Power point with digital writing board (online)
5.	Jan 3 <sup>rd</sup> week	Nuclear properties and forces, Nuclear models, Shell model, Nuclear reaction	Power point with digital writing board (online)

## NATIONAL INSTITUTE OF TECHNOLOGY, TIRUCHIRAPPALLI

6.	Jan 4 <sup>th</sup> week	Radioactivity, types and half-life. Fundamental forces	Power point with digital writing board (online)
7.	Jan 5 <sup>th</sup> Week	Particle physics, classification of matter, quark model.	Power point with digital writing board (online)
8.	Feb 1 <sup>st</sup> Week	Conductors: classical free electron theory (Lorentz –Drude theory), electrical conductivity. Superconductors: definition	Power point with digital writing board (online)
9.	Feb 2 <sup>nd</sup> Week	Meissner effect – type I & II superconductors, BCS theory (qualitative).	Power point with digital writing board (online)
10.	Feb 3 <sup>rd</sup> Week	Nanomaterials: introduction and properties, synthesis, top-down and bottom-up approach, applications.	Power point with digital writing board (online)
11.	Feb 4 <sup>th</sup> Week	Snell's law, optical fiber, principle and construction, acceptance cone numerical aperture	Power point with digital writing board (online)
12.	March 1 <sup>st</sup> Week	types of fibers - fiber optic communication principle, fiber optic sensors.	Power point with digital writing board (online)
13.	March 1 <sup>st</sup> Week	Introduction to Laser-characteristics of Lasers-spontaneous and stimulated emissions, Einstein's coefficients	Power point with digital writing board (online)
14.	March 2 <sup>nd</sup> Week	population inversion and lasing action, laser systems: He-Ne Laser, semiconductor laser applications.	Power point with digital writing board (online)

### **COURSE ASSESSMENT METHODS** (shall range from 4 to 6)

Sl. No.	Mode of Assessment	Week/Date	Duration	% Weightage
1	Assignment 1	1 <sup>st</sup> Week of Feb	1 Week	15%
2	Assignment 2	Last Week of Feb	1 Week	15%
3	Cycle test 1	3 <sup>rd</sup> Week of Jan	1 hr	20%
4	Cycle test 2	2 <sup>nd</sup> Week of Feb	1 hr	20%
CPA	Compensation Assessment*	2 <sup>nd</sup> Week of March		
6	Final Assessment *	End of Semester	2 hr 30 mins	30%

**\*mandatory; refer to guidelines on page 4**

## NATIONAL INSTITUTE OF TECHNOLOGY, TIRUCHIRAPPALLI

**COURSE EXIT SURVEY** (mention the ways in which the feedback about the course shall be assessed)

Feedback from the students will be taken twice (mid-semester and end of the semester) on the depth of the knowledge gained, effectiveness of the methodology adopted, and scope of improvement.

**COURSE POLICY** (including compensation assessment to be specified)

The lecture notes (pdf) and class videos will be available at the end of every units in MS teams class material.

Compensation assessment shall be conducted only for those students who were absent in their regular assessment.

**ATTENDANCE POLICY** (A uniform attendance policy as specified below shall be followed)

- At least 75% attendance in each course is mandatory.
- A maximum of 10% shall be allowed under On Duty (OD) category.
- Students with less than 65% of attendance shall be prevented from writing the final assessment and shall be awarded 'V' grade.

**ACADEMIC DISHONESTY & PLAGIARISM**

- Possessing a mobile phone, carrying bits of paper, talking to other students, copying from others during an assessment will be treated as punishable dishonesty.
- Zero mark to be awarded for the offenders. For copying from another student, both students get the same penalty of zero mark.
- The departmental disciplinary committee including the course faculty member, PAC chairperson and the HoD, as members shall verify the facts of the malpractice and award the punishment if the student is found guilty. The report shall be submitted to the Academic office.
- The above policy against academic dishonesty shall be applicable for all the programmes.

## Guidelines

- a) The number of assessments for any theory course shall range from 4 to 6.
- b) Every theory course shall have a final assessment on the entire syllabus with at least 30% weightage.
- c) One compensation assessment for absentees in assessments (other than final assessment) is mandatory. Only genuine cases of absence shall be considered.
- d) The passing minimum shall be as per the regulations.

B.Tech. Admitted in				P.G.
2018	2017	2016	2015	
35% or (Class average/2) whichever is greater.		(Peak/3) or (Class Average/2) whichever is lower		40%

- e) Attendance policy and the policy on academic dishonesty & plagiarism by students are uniform for all the courses.
- f) Absolute grading policy shall be incorporated if the number of students per course is less than 10.
- g) Necessary care shall be taken to ensure that the course plan is reasonable and is objective.
